# Five Year Land Supply

## 1. Introduction

This Five Year Land Supply Report ('the Report') is to be used for the purposes of decision taking from its publication on 13 October 2021.

This report sets out the process for calculating the five year land supply based on the requirements of the revised National Planning Policy Framework (NPPF) published in July 2021, and associated NPPG as regularly updated.

National Policy states that:

*'Local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old<sup>1</sup>.'*

The current strategic plan for East Cambridgeshire is the Local Plan, which was adopted on 21<sup>st</sup> April 2015. Since the Council's plan exceeds five years old, the housing requirement set out in it must no longer be used to calculate the housing land supply position. Instead, the 'local housing need' requirement must be used. This was confirmed by Inspector Searson in September 2020 in an appeal decision for Land between 27 and 39 Sutton Road, Witchford (APP/V0510/W/20/3245551).

## 2. Housing Requirement ('Local Housing Need')

The most recent changes to the National Planning Practice Guidance (NPPG) in relation to Housing Need Assessment<sup>2</sup> were published in December 2020. This guidance sets out the government's standard methodology for assessing local housing need. It may also be useful to read government's document "*How is a minimum annual local housing need figure calculated using the standard method?*"<sup>3</sup>

### Step 1 – Setting the Baseline (household growth projections)

The first step involves a projection of household growth, which, the NPPG states, should be based on the 2014-based ONS Household Growth Projections (see Table 406) (please note: Government has stated that the 2016-based projections should not be used, and whilst 2018-based projections were published in June 2020, the standard method continues to advise that the 2014-based be applied).

The NPPG makes it clear that:

*"Using these projections, calculate the projected average annual household growth over a 10 year period (this should be 10 consecutive years, with the current year being used as the starting point from which to calculate growth over that period)."*<sup>4</sup>

<sup>4</sup> Paragraph: 004 Reference ID: 2a-004-20201216

For East Cambridgeshire, the 2014-based household projections forecast a household increase between 2021 (base year – 2021 – 39,066 households) and 2031 (year 10 – 2031 – 43,327) is 4,261 households **which, as at October 2021, equates to a 10-year average of 426.1 households.**

Reflecting commentary by Inspector Pearson in APP/V0510/W/20/3245551, come 1 January 2022, the 'current year' becomes 2022, therefore the calculation is updated slightly, with the 2014-based household projections forecast a household increase between 2022 (base year – 2022 – 39,503 households) and 2032 (year 10 – 2032 – 43,738) is 4,235 households **which, from 1 January 2022, equates to a 10 year average of 423.5 households.**

## **Step 2 - An Adjustment to take account of Affordability**

The second step involves an adjustment to take into account affordability using government's 'most recent' median workplace-based affordability ratios<sup>5</sup> data (see Table 5c of such data).

At the time of writing, the latest such ratios data was released in March 2021. The NPPG advises that 'the most recent' ratios should be used.

The latest ratio of median house price to the median gross annual workplace- based earnings is for the year 2020 and is established as being 11.12 for East Cambridgeshire.

The NPPG then sets out the following method to calculate the local housing need figure:

$$\text{Adjustment factor} = \left( \frac{\text{Local affordability ratio} - 4}{4} \right) \times 0.25 + 1$$

For East Cambridgeshire, the Local Housing Need figure is therefore calculated as follows:

$$\text{Adjustment Factor} = (11.12 - 4) / 4 \times 0.25 + 1 = 1.445$$

Using that adjustment figure of 1.445, the Local Housing Need figure can be calculated for East Cambridgeshire:

$$\text{Annual Local Housing Need Figure} = 1.445 \times 426.1 = 615.715$$

At the time of publication of this Report, therefore, **the appropriate Local Housing Need figure for East Cambridgeshire is 615.715 dwellings per annum, and this is valid until 31 DECEMBER 2021.**

**From 1 JANUARY 2022, the following applies:**

$$\text{Annual Local Housing Need Figure} = 1.445 \times 423.5 = 611.958$$

---

<sup>5</sup> See

<https://www.ons.gov.uk/peoplepopulationandcommunity/housing/datasets/ratioofhousepricetoworkplacebasedearningslowerquartileandmedian>

Thus, the appropriate Local Housing Need figure for East Cambridgeshire is 615.715 dwellings per annum until 31 December 2021 and 611.958 dwellings from 1 JANUARY 2022.

For the avoidance of doubt, *Step 3 - Capping the level of any increase* and *Step 4 - cities and urban centres uplift* (as set out in the NPPG) are not applicable to East Cambridgeshire's Local Housing Need calculation.

### 3. Five Year Basic Requirement

The NPPG - [Housing and economic land availability assessment](#)<sup>6</sup> sets out the method for calculating five year land supply.

Up to 31 December 2021: The annual requirement figure of 615.715 is used as the basic starting point for this five year land supply report. **The basic five year requirement equals 3,078.575 (615.715 × 5).**

From 1 January 2022: The annual requirement figure of 611.958 is used as the basic starting point for this five year land supply report. **The basic five year requirement equals 3,059.790 (611.958 × 5).**

### 4. Additional 'Buffer'

Paragraph 74 of the NPPF states:

*'The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:*

- a) 5% to ensure choice and competition in the market for land; or*
- b) 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or*
- c) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply'*

Footnote 41 of the NPPF is linked to (c) above and states that:

*This will be measured against the Housing Delivery Test, where this indicates that delivery was below 85% of the housing requirement.*

Criterion (b) above does not apply to East Cambridgeshire, because ECDC has not sought to establish its position through an annual position statement. Accordingly, either (a) or (c) must apply.

The latest Housing Delivery Test (HDT) results were published in January 2021, providing a measurement for the financial years 2017/18, 2018/19 and 2019/20<sup>7</sup>.

East Cambridgeshire's 2020 HDT measurement is 87%. As this **exceeds** the 85% threshold, **the Council must apply a 5% buffer in calculating the five year land supply.** It has done so in this

<sup>7</sup> HDT Measurement 2020 available at: [Housing Delivery Test: 2020 measurement - GOV.UK \(www.gov.uk\)](#)

Report. This was confirmed as appropriate by Insp Chamberlain in a joint appeal decision of 21 April 2021 - APP/V0510/W/18/3213834 and APP/V0510/W/19/3227487.

## 5. Backlog

On the basis that the Local Plan 2015 is more than five years old, and therefore the Local Housing Need figure is used in this report, it means no additional 'backlog' be applied to the calculations in this report. This is confirmed in the NPPG<sup>8</sup>:

*'The affordability adjustment is applied to take account of past under-delivery. The standard method identifies the minimum uplift that will be required and therefore it is not a requirement to specifically address under-delivery separately.'*

*'Where an alternative approach to the standard method is used, past under delivery should be taken into account.'*

Any surplus or deficit in housing completions in years prior to year 1 are not, therefore, relevant to this Report.

## 6. Calculating the updated five year requirement

This Five Year Land Supply Report covers the period 1 April 2021 to 31 March 2026. The following table sets out the total requirement including the required buffer and backlog.

**Table 2a: Five-year requirement including five percent buffer – UP TO 31 DECEMBER 2021**

		Dwellings (units)	Calculation / Source
a	Basic Five-Year Requirement	3,078.575	615.715 x 5
b	5% buffer	153.929	a x 5%
c	Five Year requirement	3,232.504	a + b
d	Average annual requirement 2021 to 2026	646.501	c ÷ 5

To meet the requirement to demonstrate a five-year supply of deliverable housing land, **the requirement between 2021 and 2026 is a total of 3,233 dwellings (rounded), at an annual rate of 647 homes per year (rounded) UP TO 31 DECEMBER 2021.**

<sup>8</sup> Paragraph: 011 Reference ID: 2a-011-20190220

**Table 2b: Five-year requirement including five percent buffer – FROM 1 JANUARY 2022**

		Dwellings (units)	Calculation / Source
a	Basic Five Year Requirement	3,059.790	611.958 x 5
b	5% buffer	152.990	a x 5%
c	Five Year requirement	3,212.780	a + b
d	Average annual requirement 2021 to 2026	642.556	c ÷ 5

To meet the requirement to demonstrate a five-year supply of deliverable housing land, **the requirement between 2021 and 2026 is a total of 3,213 dwellings (rounded), at an annual rate of 643 homes per year (rounded) FROM 1 JANUARY 2022.**

## 7. Five Year Supply

This section sets out how the supply of sites to meet the five year requirement has been identified. For a site to be considered deliverable Annex 2 of the NPPF (2021) provides the following definition of *deliverable*:

***Deliverable:*** *To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:*

- a) *sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).*
- b) *where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.*

The definition of deliverable in the NPPF does not expressly refer to other sites which do not fall into category (a) or (b). Any such sites therefore would be considered under the opening sentence of the definition.

NPPG provides further guidance, which is extensive and not repeated in full here, but can be found at <https://www.gov.uk/guidance/housing-supply-and-delivery>.

In terms of ‘deliverability’, the following is most relevant<sup>9</sup>:

*‘As well as sites which are considered to be deliverable in principle, [the NPPF] definition also sets out the sites which would require further evidence to be considered deliverable, namely those which:*

<sup>9</sup> Paragraph: 007 Reference ID: 68-007-20190722

- have outline planning permission for major development;
- are allocated in a development plan;
- have a grant of permission in principle; or
- are identified on a brownfield register.

Such evidence, to demonstrate deliverability, may include:

- current planning status – for example, on larger scale sites with outline or hybrid permission how much progress has been made towards approving reserved matters, or whether these link to a planning performance agreement that sets out the timescale for approval of reserved matters applications and discharge of conditions;
- firm progress being made towards the submission of an application – for example, a written agreement between the local planning authority and the site developer(s) which confirms the developers' delivery intentions and anticipated start and build-out rates;
- firm progress with site assessment work; or
- clear relevant information about site viability, ownership constraints or infrastructure provision, such as successful participation in bids for large-scale infrastructure funding or other similar projects.'

In helping to determine what sites can be counted as 'deliverable', it is also helpful to review recent SoS and Inspectorate decisions.

One such very recent case is Recovered appeal: 97 (and land adjacent to) Barbrook Lane, Tiptree, Colchester (ref: 3223010 - 7 April 2020) available here:

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/878446/combined\\_DL\\_IR\\_R\\_to\\_C\\_97\\_and\\_land\\_adjacent\\_to\\_Barbrook\\_Lane\\_Tiptree\\_Colchester\\_CO5\\_0JH.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/878446/combined_DL_IR_R_to_C_97_and_land_adjacent_to_Barbrook_Lane_Tiptree_Colchester_CO5_0JH.pdf)

In this recovered appeal, the SoS agrees with the Inspector deliberations and conclusions on the housing land supply. In this case, the Inspector stated as follows:

*"168. It is a matter of dispute between the two parties as to whether the definition of "Deliverable" in the glossary of the Framework comprises an essentially closed list and both parties have drawn my attention to the St Modwen judgement and to a number of appeal decisions with differing conclusions on this matter. In my mind, the words "in particular" denote particular examples. There is nothing in the Framework that confirms that the list is closed and therefore I do not read it to be so. The St Modwen judgement is therefore still relevant. It is clear from the glossary definition that for sites to be considered deliverable, they should be available now, offer a suitable location for development now and be achievable with a realistic prospect that housing will be delivered on the site within five years.*

*169. In respect of Category B type sites, the glossary says that such sites should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years. The Planning Practice Guidance sets out what further evidence "may include". Therefore, the list of evidence in the PPG is not exhaustive either.*

*170. I am of the general view that if a site is unallocated in an adopted development plan, but included in the latest housing trajectory, then it should not automatically be disregarded if permission is granted after the "base date" as the risk of "skewing" the housing figures would be minimal. This is especially so in Colchester where permissions do not tend to lapse."*

The Inspector then goes on to examine a number of sites where the parties disagreed on delivery, and the deliberations there, whilst of course site specific, help to establish through a SoS decision what kinds of sites are 'deliverable' and which are not. It also confirms the principle that a windfall allowance

can form part of the supply (578 homes in this particular case, which is over 10% of both the required supply and the identified supply).

Local to this district, and in September 2020, Inspector Searson (APP/V0510/W/20/3245551) also deliberated on these matters, and the Council has, in preparing this Report, been informed by her deliberations.

The Council is confident its approach in this Report is entirely consistent with this SoS recovered appeal decision and the more recent Inspector Searson decision.

### **Deliverable sites**

Appendix A provides a list of all available and deliverable sites between 1 April 2021 and 31 March 2040. For clarity, the trajectory is organised by planning status of sites (for example, non-major development, sites with detailed planning permission, sites with outline permission, etc.), reflecting the NPPF definition.

For committed sites, Appendix A identifies the planning application reference and date permission was granted. It identifies the total number of dwellings permitted on site and total dwellings completed on site at 31 March 2021. This leaves the outstanding dwelling figure (i.e. 'net commitment') as at 1 April 2021. For Local Plan allocations, Appendix A identifies the Local Plan allocation reference and the indicative dwelling figure as set out in the corresponding Local Plan policy.

The Appendix includes a trajectory showing the estimated delivery rate for all committed housing sites for each year between 2020 and 2039. The five-year period is highlighted to show total dwellings estimated to be delivered during the five-year period 2020 to 2025. Appendix A is organised as follows:

- Appendix A (i) Trajectory of sites which are not "major development"
- Appendix A (ii) Trajectory of sites with detailed planning permission
- Appendix A (iii) Trajectory of sites with outline planning permission
- Appendix A (iv) Trajectory of sites allocated in adopted Development Plan
- Appendix A (v) Trajectory of sites without consent, deliverable within five years
- Appendix A (vi) Trajectory of sites **not** deliverable within five years (*of any planning status*)

### **Windfall allowance**

The five-year supply calculation includes an allowance for windfall development. Paragraph 70 of the NPPF states that:

*'Where an allowance is to be made for windfall sites as part of anticipated supply, there should be compelling evidence that they will provide a reliable source of supply. Any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends'.*

Appendix B provides compelling evidence of historical windfall rates, and demonstrates that a windfall allowance of 50 per year is a reasonable if somewhat pessimistic rate compared with historic trends. No allowance has been made for the first two years as it is expected that any unallocated sites delivered within that time would likely already be under construction or have planning permission. This gives a total of 150 dwellings in the five year period, a figure which is highly likely to be exceeded.

The Council has not amended the approach to windfall allowance since it was tested by Inspector Searson (APP/V0510/W/20/3245551) in September 2020. In that decision, the Inspector concluded that the Council's approach "to be a robust approach which meets the compelling evidence test."

### **Older people's accommodation**

National planning practice guidance explains the contribution which older peoples' accommodation in use class C2 makes toward the housing requirement:

*'Local planning authorities will need to count housing provided for older people, including residential institutions in Use Class C2, against their housing requirement. For residential institutions, to establish the amount of accommodation released in the housing market, authorities should base calculations on the average number of adults living in households, using the published census data.'*<sup>10</sup>

Appendix C sets out how the Council has applied the method for calculating accommodation released by such residential institutions, and details committed sites considered deliverable within the five-year period. This projected supply has been included in the five-year supply calculation.

### **Developer survey**

In August 2021 the Council wrote to agents / developers involved in the delivery of large sites, inviting them to review the information held by the Council about their site, confirm its accuracy and make amendments where necessary. The responses to this survey exercise are provided at Appendix D, and those responses directly informed the sites trajectory at Appendix A.

### **Calculating supply**

Table 3 provides a summary of the Council's five-year land supply of deliverable sites. The Five-Year period runs between 1 April 2021 and 31 March 2026. Appendix A provides details of all housing sites and potential housing numbers which could be delivered each year. Appendix B explains how supply from windfall has been estimated. Appendix C details projected supply of older people's accommodation in use class C2.

It should be noted that this table is produced on the basis of likely deliverable housing as at 1 April 2021.

<sup>10</sup> Paragraph: 043 Reference ID: 3-043-20180913

**Table 3: Dwelling supply in five year period**

		Five Year Supply						Future supply	Total
Site Status at 01 April 2021		Year 1	Year 2	Year 3	Year 4	Year 5	Total Five Year	Total Year Six Onwards	
		21/22	22/23	23/24	24/25	25/26

Total		685	1,237	976	805	821	4,524	5,663	10,187

The Council has identified land that is estimated, based on evidence set out in appendices A-C, to be capable of delivering 4,524 dwellings within the five-year period, with such a supply consistent with national policy and case law. This supply is considerably higher than the five-year requirement, which is, until 31 December 2021, 3,233 dwellings (see Table 2a) or, from 1 January 2022, 3,213 dwellings (see table 2b). This leaves a surplus of 1,291 dwellings (until 31 December 2021), or 1,311 dwellings (from 01 January 2022).

### Dwelling supply (years)

Expressed in years, this dwelling supply is equivalent to **7.00 years supply of housing land (up to 31 December 2021)**, as shown in Table 4a, or **7.04 years supply of housing land (from 1 January 2022)**, as shown in Table 4b.

**Table 4a: Five Year Supply (until 31 December 2021)**

### Conclusion

It is concluded that the Council can demonstrate a five-year supply of housing land. Through this Five-Year Land Supply Report October 2021, the Council demonstrates:

- **7.00 years supply over the five-year period (until 31 December 2021); and**
- **7.04 years supply over the five-year period (from 1 January 2022).**

10005	18/01704/FUM		Site West Of 22 To 30 High Street Ashley Suffolk	Ashley CP	Full application	13/08/2019	Demolition of existing dwelling (No.28 High Street) and construction of 10 dwellings together with vehicular access, surface water drainage, landscaping and associated infrastructure	10	0	1	0	0	0	10	9	6	3	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	0	9	Through their repsonse to the Development Sites Survey 2021, the site promoter confirmed that the demolition of a dwelling occurred in July 2021 (Year 1). 7 (6 net gain) dwellings are expected to be built in Year 1 and the remaining 3 dwellings in Year 2. The trajectory reflects the survey response.	
10007	19/00179/FUM		Potters Cottage 39 Church Street Ashley Newmarket Suffolk CB8 9DU	Ashley CP	Full application	20/04/2020	Application for 16 residential dwellings (including 40% affordable) comprising two 5xbed houses, one 4xbed house, four 3xbed houses and nine 2xbed houses along with access, car parking, landscaping and associated infrastructure	16	0	0	0	0	0	16	16	0	8	8	0	0	0	0	0	0	0	0	0	0	0	0	0	0	16	The site has detailed permission and is considered deliverable within the five year period, as per the NPPF definition.		
50028	18/01238/RMM		Stanford Park, Weirs Drove, Burwell, Cambridge CB25 0BP	Burwell CP	Reserved Matters application	01/07/2019	Reserved matters for change of use of existing caravan touring park site for the siting of up to a maximum of 91 mobile homes with new access to include communal open space, resident meeting hall, park office and associated park infrastructure pursuant to outline planning permission 16/00686/OUM	91	0	0	0	0	0	91	91	0	10	18	18	18	18	9	0	0	0	0	0	0	0	0	0	0	0	91	In response to the Development Sites Monitoring Survey 2021, the Deputy Group Manager of the park homes site confirmed that park homes are slower to sell than bricks and mortar dwellings. In addition, the COVID-19 pandemic has affected park home manufacturers through impacting supply chains and increasing demand for holiday lodges from holiday parks. The trajectory has been amended to reflect the Deputy Group Manager's sales estimate.

Assume this remaining phase(s) will deliver new dwellings following completion of the first phase (17/01722/RMM) i.e. from year 4 at a rate of 50dpa. A response to the Development Sites Survey 2021 was received which confirmed the estimated delivery rate of 50dpa. However, the site promoter indicates the site would deliver completions from Year 1 onwards. The Council has opted to take a more cautious approach, with dwelling completions estimated from Year 4 onwards, reflecting the current planning status of the site.

## Appendix B – Windfall Justification

The housing supply can also include an assumption for future windfall development. Paragraph 70 of the NPPF states that:

*‘Where an allowance is to be made for windfall sites as part of anticipated supply, there should be compelling evidence that they will provide a reliable source of supply. Any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends’*

The definition of windfalls in the Glossary to the NPPF states they are sites which have not been specifically identified in the Local Plan process. Therefore a windfall is any site that produces dwellings, but has not been identified in the Local Plan process.

The adopted Local Plan 2015 typically allocates sites with capacity for 10 dwellings or more<sup>1</sup>. The adopted Local Plan 2015 contains policies which enable small scale residential developments to take place over the plan period. Therefore there is justification for including a windfall allowance for small sites of fewer than 10 dwellings.

### **Local Plan policies for small-scale development**

The Local Plan 2015 applies ‘Development Envelopes’ around the built areas of existing settlements. In principle, development is generally acceptable within the Development Envelope (see policy *Growth 2: Locational Strategy* and draft policy *LP3: The Settlement Hierarchy and the Countryside*). Over the plan period there are likely to be numerous opportunities for windfall development within Development Envelopes.

In addition, the adopted Local Plan 2015 enables certain forms of development to take place in the countryside (i.e. outside of Development Envelopes), for example Affordable Housing exception sites; dwellings for rural workers; the replacement of existing dwellings in the countryside; and, the re-use and conversion of non-residential buildings for residential use (see policies *HOU4*, *HOU5* and draft policy *LP31*).

### **Historic windfall delivery**

Developments of fewer than 10 units almost without exception occur on sites not allocated in the adopted Local Plan. As such small sites can generally be considered to be “windfall development”. To provide an estimate of the level of windfall development which might reasonably be expected to be delivered in the future, this section analyses historic housing completions by size of site.

Cambridgeshire County Council supplied housing completions data for East Cambridgeshire district prior to 31 March 2017, with housing completions data from 01 April 2017 onward provided by East Cambridgeshire District Council.

---

<sup>1</sup> The Local Plan 2015 includes a small number of site allocations with a capacity of less than 10 dwellings, but the total capacity of such sites is negligible relative to the overall dwelling supply.

This data has been analysed to calculate annual historic windfall delivery spanning 18 reporting years, and includes 7,356 net housing completions in total. Each site is assigned to one of the following *development classes*:

- **Estate 9+ Dwellings** – Any development site providing 9 or more residential units.
- **Group 3-8 Dwellings** – Small-scale residential development providing 3 to 8 residential units;
- **Infill 1-2 Dwellings** - Scale residential development providing 1 to 2 residential units;
- **Residential Change of Use** – Change of use of a non-residential building to one or more dwellings. Generally small-scale, however one site providing 16 dwellings (and therefore large scale) was completed in the 2014/15 reporting year and for the purposes of this note has been reassigned to the Estate 9+ Dwellings class.
- **Replacement Building** – Replacement of existing dwelling(s) or ancillary building with one or more dwellings. All records in sample are small-scale.
- **Residential Conversion** – Conversion of dwelling(s) (and in some instances non-residential buildings) to create one or more new dwellings. All records in the sample are small scale.
- **Demolition of Dwelling** – Developments involving the demolition of one or more dwellings. Generally, demolitions of dwellings occur on small-scale dwellings, for example through the development of replacement dwellings, or to open up existing garden land for development.

Whilst there likely have been exceptions, for the purposes of this assessment it has been assumed that all demolitions/losses occur on small sites.

Using these Development Class categories, it is possible to estimate total housing completions for 'large-scale' and 'small-scale' development sites.

The "Estate 9+ dwellings" Development Class can generally be considered a proxy for 'large-scale development'. Therefore all housing completions on such sites are considered as large scale development and are not considered "windfall development". It should be noted that the Local Plan 2015 considers sites of 10 or more units to be large-scale development, however data is not available at that threshold.

All other records within the development classes: "Group 3-8 Dwellings"; "Infill 1-2 Dwellings"; "Residential Change of Use"; "Replacement Building"; and, "Residential Conversion"; are considered to be small-scale and therefore *windfall development*.

Table B.1 calculates the number of housing completions by reporting year and by site capacity - either large scale or small scale. Losses through demolition are included for the purposes of calculating net total housing completions.

\*Dwellings only. Figures do not include equivalent dwelling supply from 'C2 older people's accommodation'.

Since 2002, there have been 5,481 gross completions on large sites and 2,364 gross completions on small sites. Expressed as an average, this equates to 288 gross completions per year on large sites and 124 gross completions on small sites. Demolitions and losses generally account for a relatively modest number of dwellings in each year (equivalent to approximately 1% of gross completions).

**Table B.2: Dwelling completions on small-scale windfall sites by reporting period**

Reporting Period	Small scale development i.e. "windfall" (fewer than 9 units)		
	Gross dwellings (units)	Average Gross Dwellings (units)	Percent of gross completions (%) (rounded)
Total monitoring period (2002-2021)	2,364	124	30
Since Local Plan adoption (2015-2021)	768	128	40

Table B.2 calculates the gross and average number of dwellings completed on small-scale windfall sites for the full monitoring period since 2002, and since adoption of the current adopted Local Plan in 2015.

Table B.2 indicates that since 2002, on average 124 dwellings were completed on small-scale development sites each year, and 30% of all new homes in East Cambridgeshire have been constructed on small-scale development sites.

Since adoption of the Local Plan in 2015, windfall development has averaged 128 gross dwellings per annum, with 40% of all new homes having been constructed on small-scale windfall sites.

### **Analysis and conclusions**

The historic data illustrates that in each year, a significant portion of total new homes built are constructed on small-scale windfall sites. On average 124 new dwellings are completed each year on small-scale windfall sites, equivalent to 30% of gross annual dwelling completions.

The Local Plan includes a number of policies which enable small-scale windfall developments, both within development envelopes and in certain circumstances, in the countryside. It is therefore likely that small-scale windfall development will continue to generate a substantial number of new dwellings over the plan period.

Due to the flexibility offered by such policies, it is possible that the number of small-scale windfall developments could increase. However, land is inevitably finite – as more sites are developed, fewer remain available for development.

It is assumed that most windfall development which will be completed in the next two years would already have planning permission and would likely be broadly accounted for in the commitment data shown elsewhere in this Five Year Land Supply report. Therefore, for the purposes of the housing trajectory and five year land supply calculation, **it is assumed that 'new' small-scale windfall development will occur from 2023/24 at a rate of 50 units per annum.**

As illustrated by past trends, this windfall allowance is highly likely to be exceeded and is considered to be a conservative estimate (50 dwellings equates to just 40% of gross average

small-scale windfall completions). It is therefore justified to allow for this amount in the plan period and for feeding into calculations of the five-year land supply.

### **Community Land Trust developments**

East Cambridgeshire District Council is highly supportive of community-led development, which is delivered primarily through a Community Land Trust (CLT) model. The Council takes a proactive role, offering a programme of support to CLTs, and as such expects a substantial proportion of new development to be delivered via CLTs.

Reflecting this important local priority, the adopted Local Plan 2015 supports community-led development through policy *Growth 6*. The Local Plan's locational strategy, as set out in policy *GROWTH 2*, enables community-led development schemes to be developed in locations which would otherwise not be acceptable for the development of market housing schemes (such as locations outside of *Development Envelopes*), thereby increasing the supply of land available for community-led development. Due to the level of support offered by the Local Plan it is believed that further windfall sites will be delivered in the form of community-led development, and the CLT model of delivery will gain impetus over the plan period.

Whilst the the delivery of community-led development is likely over the plan period, the Council has applied a cautious approach and not included community-led development units within the five-year calculation.

## Appendix C – Dwelling Supply Older People's Accommodation

National Planning Practice Guidance sets out the method for counting residential institutions which provide accommodation for older people, against the housing requirement<sup>1</sup>.

To establish the amount of accommodation released in the housing market, the NPPG states that calculations should be based on the average number of adults living in households, using the published census data.

At the time of the census 2011, there were 7,256 adults aged 75 or over in 4,874 households within East Cambridgeshire. This provides a ratio of 1.5 (rounded to 1dp).

Using the published census data for older people in East Cambridgeshire, the following table provides a worked example to show the amount of accommodation released, expressed as number of dwellings, by a 50-bed care home.

### Example: 50-bed care home scenario

*No. of beds / ratio = accommodation released (dwellings)*

Beds	50
Ratio	1.5
<b>Accommodation released ( dwellings)</b>	<b>33</b>

## Completions in Monitoring Year

No developments resulted in the gain or loss of C2 older people's accommodation in the reporting year.

## Dwelling supply

Table C.i provides details of sites which the Council expects to deliver older people's accommodation in use class C2 (e.g. care home, nursing home, etc.), within the five year period. Applying the ratio, these developments provide accommodation equivalent to 97 dwellings.

## Conclusions

In conclusion, there were no net completions in the 2020/21 reporting year.

The supply from dwellings within the five year period should be increased by **97 dwellings** (Table C.ii), to reflect provision of older people's accommodation (in C2 use class).

## Appendix D – Agent / Developer Responses

In August 2021, the Council wrote to agents and developers involved in the development of large sites in the district. Each agent / developer was sent a bespoke form which set out the data which the Council held on its site – including an estimated trajectory. Through the form, agents / developers were requested to review the data the Council holds about their site and confirm whether the data is accurate, making amendment as necessary. The following table details the responses received by site.
